

the beauty of wood
that just does
not rot?

more than a wall cladding

Le'Ceramica®
insulated porcelain cladding panels

relaxing is simple in beautiful surroundings
with absolutely zero maintenance bills for life

fully insulated panels to R-3.0

direct to stud hidden fixing

fast easy mechanical fitting

affordable value and quality

an easy choice

Enjoy the choice of wood finish you like, without the rot. You can forget costly paint and maintenance for the life of your building. You will save some serious \$\$\$

Porcelain is one of the most resilient and durable walling materials on the planet.

Le'Ceramic is virtually scratch resistant, and totally frost resistant, with a porosity and moisture absorption rate of less than 0.5%. So durable it offers a lifetime of cost savings if compared to timber, fibre cement or vinyl cladding.

Available in 1200mm x 200mm boards or 1200mm x 600mm panels. Weight 22kgs sq metre with 60mm laminated thickness.

metal that does not rust

'antique charm without the maintenance'

'steeling from CORTEN'

NOTE : These finishes can also be produced in smaller blocks at 300mm heights as requested in fixed lengths of 1200mm and 600mm, or random lengths of 1200mm, 700mm, 600mm and 500mm

Rustic Metal Series (matt light texture)

Perfect for that old weathered or shabby chic look. These rusty metal examples display the authenticity of aged metal, without the damaging physical rust usual in Corten steel claddings lifespan. What you see, is what you get, and what you get is for the life of the building. Unlike Corten steel, there is zero messy ongoing rust staining.

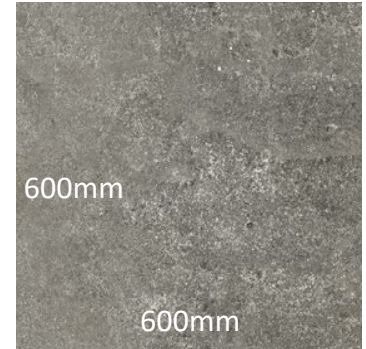

There is an intrinsic natural beauty in aged Corten steel and rusty iron. It can however create some problems where used with other cladding and with window and door surrounds, due to ongoing rust staining. No such problems with Porcelain cladding. That's got to be good.

Available in 1200mm x 600mm and 1200mm x 300mm sizes

FIXINGS AND FITTINGS AS REQUIRED

Weatherboard wall claddings that truly are
“WEATHER” boards. No PAINTING, no ROT!

Stunning good looks and charm. What more can you ask for?

When it comes to home comfort Le’Ceramic insulated wall cladding is hard to beat. Porcelain, pressure laminated to high density insulation board allows you to be cool in summer, and warm in the winter cold. A system thermal value of R-3.0 offering year round protection from heat and cold. The high density closed cell insulation board is impervious to moisture and rot, providing a lifetime free from hefty painting maintenance bills.

The durability of porcelain is proven centuries over. With moisture absorption rate of just 0.05% forget those frost problems. Scratch resistant and so easy to clean, Le’Ceramic will look as good in 20 years as the day it was fitted.

Fast and easy installation.

Yes, with a simple ‘direct to stud’ mechanical fixing system it makes installation an absolute breeze. It’s a cavity system that protects the structural wall from any possible water and moisture ingress. Natural insurance.
